KEUCO COLOURS CATALOGUE

“KEUCO COLOURS YOUR WORLD

The bathroom now has a more opulent appearance thanks to the use of colours. Create natural minimalism in a serene, sumptuous manner.

Colour gives these tranquil spaces in bathrooms a personal touch, breaking up the monotony by adding the right amount of colour to create vibrancy. On the one hand, it can relief stress and anxiety; on the other, it can raise people's spirits and motivation.

It might be more difficult than it seems to create a place that is both functional and aesthetically pleasing, especially when it comes to utilitarian areas like the bathroom. And this is especially true when there are few design and colour options for fixtures. To assist you achieve your desired style, KEUCO's products offers are now available in a variety of stunning colours: brushed bronze, brushed nickel, and brushed black chrome finishes.

“ CONVEY YOUR INDIVIDUALITY

Whether you love your curves, or your edges, KEUCO has got you covered. All colour finishes are available in both rectilinear and elliptical designs.

ELEGANCE MADE IN GERMANY

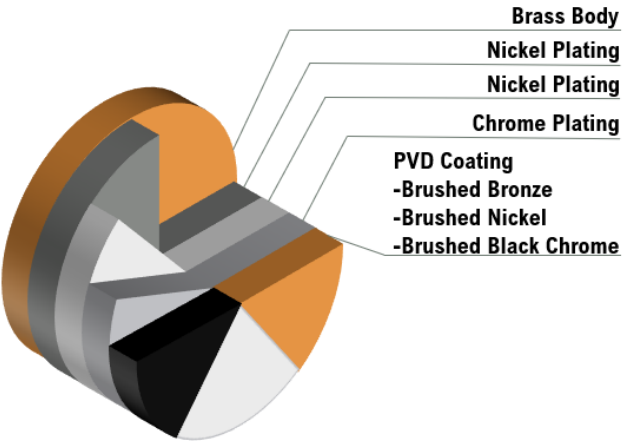

The exquisite attention to detail in KEUCO products is what makes them unique. The KEUCO accessories establish special accents and create a sensual ambiance in the bathroom with their delicate yet exquisite design and special functional qualities in the details that make them exceptionally practical to use.

“ What is PVD?

Physical vapor deposition, or PVD coating describes a thin film deposition method. A product is placed into a vacuum chamber and given a negative charge to it. The colour materials are vaporized and given a positive charge to them. They are released into the chamber and the oppositely charged particles then get distributed on to the product surfaces very evenly, and very durably.

Why PVD?

It is highly scratch resistant and a few times harder than chrome. Keuco uses 4 layers of plating (PVD layer included as shown below). 2 layers of nickel plating are first applied. The product then goes through chrome electroplating for it's third layer. These steps are crucial in getting a smooth, perfect surface. Finally it goes through the PVD colour finishing process and a high quality bathroom fitting is delivered.

“

Give your bathroom a vintage vibe with softer, warmer tones. The brushed surface of this long-lasting finish provides a warm metallic shine that is complementary to any style, while the easy to clean long - lasting finish radiates a warm golden tone that wonderfully emphasizes every minute detail.

“

The KEUCO Brushed Black Chrome will make your bathroom look inspired in mid-tone settings like light wood or concrete as well as in tone-on-tone settings where several shades of the same colour are stacked together. Additionally, it complements a bathroom that is entirely white beautifully, allowing the fixtures and accessories to contrast and stand out. Brushed Black Chrome is a traditional yet contemporary approach to the colour scheme of interior design. You can decide whether you want it to stand out or blend in.

“Brushed Nickel – Classical look

Trying to find the elements suitable for a softer design? KEUCO's Brushed Nickel items can give your bathroom a beautifully traditional appearance and enhance it. Brushed nickel is not only aesthetically pleasing but also long-lasting and simple to maintain. This adaptable finish looks equally at home in elegantly traditional spaces with rich wood features and traces of warmth as it does in bathrooms with cool blue accents and contemporary touches.

“ KEUCO installation is a breeze

- Space saving
 - Basin mixers only need minimum of 70mm depth
 - Shower mixers and diverters only need minimum of 80mm depth
- Flexibility of installation
 - For basin mixer body, the handle can be located above or below; on the left or on the right of the spout
 - Shower mixers and diverter bodies do not need to be placed directly next to each other
 - Easily customize the height of your bathroom mixers
 - Switch between round and square plates at any time
- Room for errors
 - Simply adjust the 4 screws on the wall to make up for uneven wall
 - Additional extension kits can be purchase if 110mm wall depth exceeded
- Ease of specification
 - With lesser components, detailing during ID work is much easier
