

Hygiene & Disinfection

Sanitising in style

Everyday hygiene is an important part of staying healthy. Hand hygiene is very important where large numbers of people meet and potentially are in contact with the same door handles or objects. Rule number one: frequent handwashing. Those looking for additional protection can use Sanitisers. Also ideal for spontaneous hand-hygiene needs.

HYGIENE AND DISINFECTION

Experience individual solutions
for day-to-day and work use.

Hygiene with intelligence

The contactless KEUCO PLAN dispenser for foam soap or liquid sanitiser is available in either floor standing or wall mounted options with mains or battery powered variants. The sensor detects the hand held under it and supplies the preset amount.

FILLING

Refill bags for disinfectant foam and liquid disinfectants can be ordered here:

link.keuco.com/hagleitner

Available in aluminium anthracite or aluminium silver anodized/anthracite, the high-quality automatic dispenser is known for its excellent workmanship and exceptional steadiness. Thanks to the infrared sensor, the wall-mounted PLAN dispenser can be used completely without any contact. It is perfect for high-traffic areas in semi-public and public buildings. In addition to a chrome-plated finish, it is also available in silver anodized or stainless steel finish, so it harmonises perfectly with its surroundings.

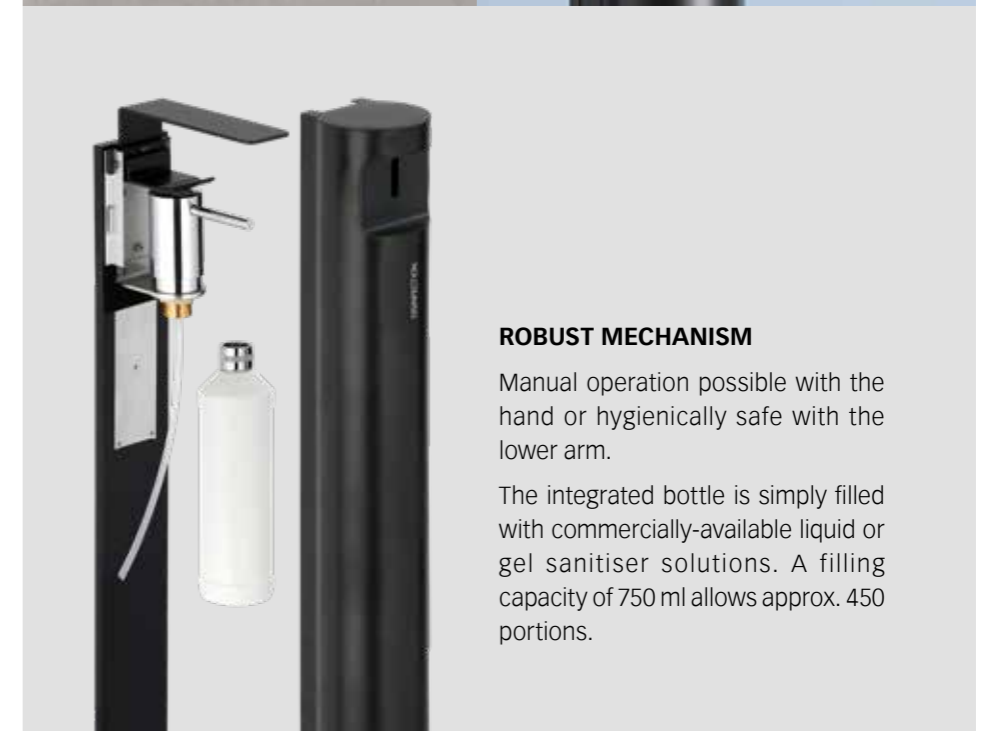

For the electronic pump system and the matching vacuum bags with foam soap or liquid sanitiser, KEUCO partners with the established hygiene specialist Hagleitner from Austria. Hagleitner is one of the leading companies in Europe for innovative hygiene solutions. The sanitising solutions are state-of-the-art and effective, but still gentle on the skin.

Steady and high quality

Allow us to introduce: The ideal PLAN sanitiser dispenser for the entrance area, at the lift, outside the cafeteria or in the hallway.

With its understated exterior in anodized silver & black or all black, it definitely tends towards understatement. But with its combination of design and function, it comes across as perfectionist. The generously-sized base plate, which guarantees its steadiness, also serves as a drip tray.

ROBUST MECHANISM

Manual operation possible with the hand or hygienically safe with the lower arm.

The integrated bottle is simply filled with commercially-available liquid or gel sanitiser solutions. A filling capacity of 750 ml allows approx. 450 portions.

Suitable for clinical use

The PLAN CARE dispenser for liquid sanitiser is perfect for hospitals and health facilities.

QUICK REPLACEMENT

The dispenser is designed for various standard European 0.5 l bottles. The contents and the fill level of the solution can be quickly ascertained in the front viewing window.

It can be operated intuitively with a mechanical lever, and can even be operated with your arm. A drip tray is integrated in the design. The wall-mounted sanitiser dispenser is available in anodized silver & black or all black finish.

Handy and practical

The attractive and compact sanitiser dispenser from KEUCO combines fine design with optimal dosing technology – for day-to-day hand sanitising at home or at work.

As a table-top model in matt black, turquoise, red and blue, or as a wall-mounted model with a completely chrome-plated finish, the universal sanitiser dispenser is perfect for private homes and offices where stylish surroundings are valued.

DOUBLE-JACKETED SYSTEM

The interior plastic container is easy to access for problem-free filling. With a filling capacity of 250 ml and dosage of 1 ml per stroke, it is suitable for commercially available liquid or gel sanitiser solutions.

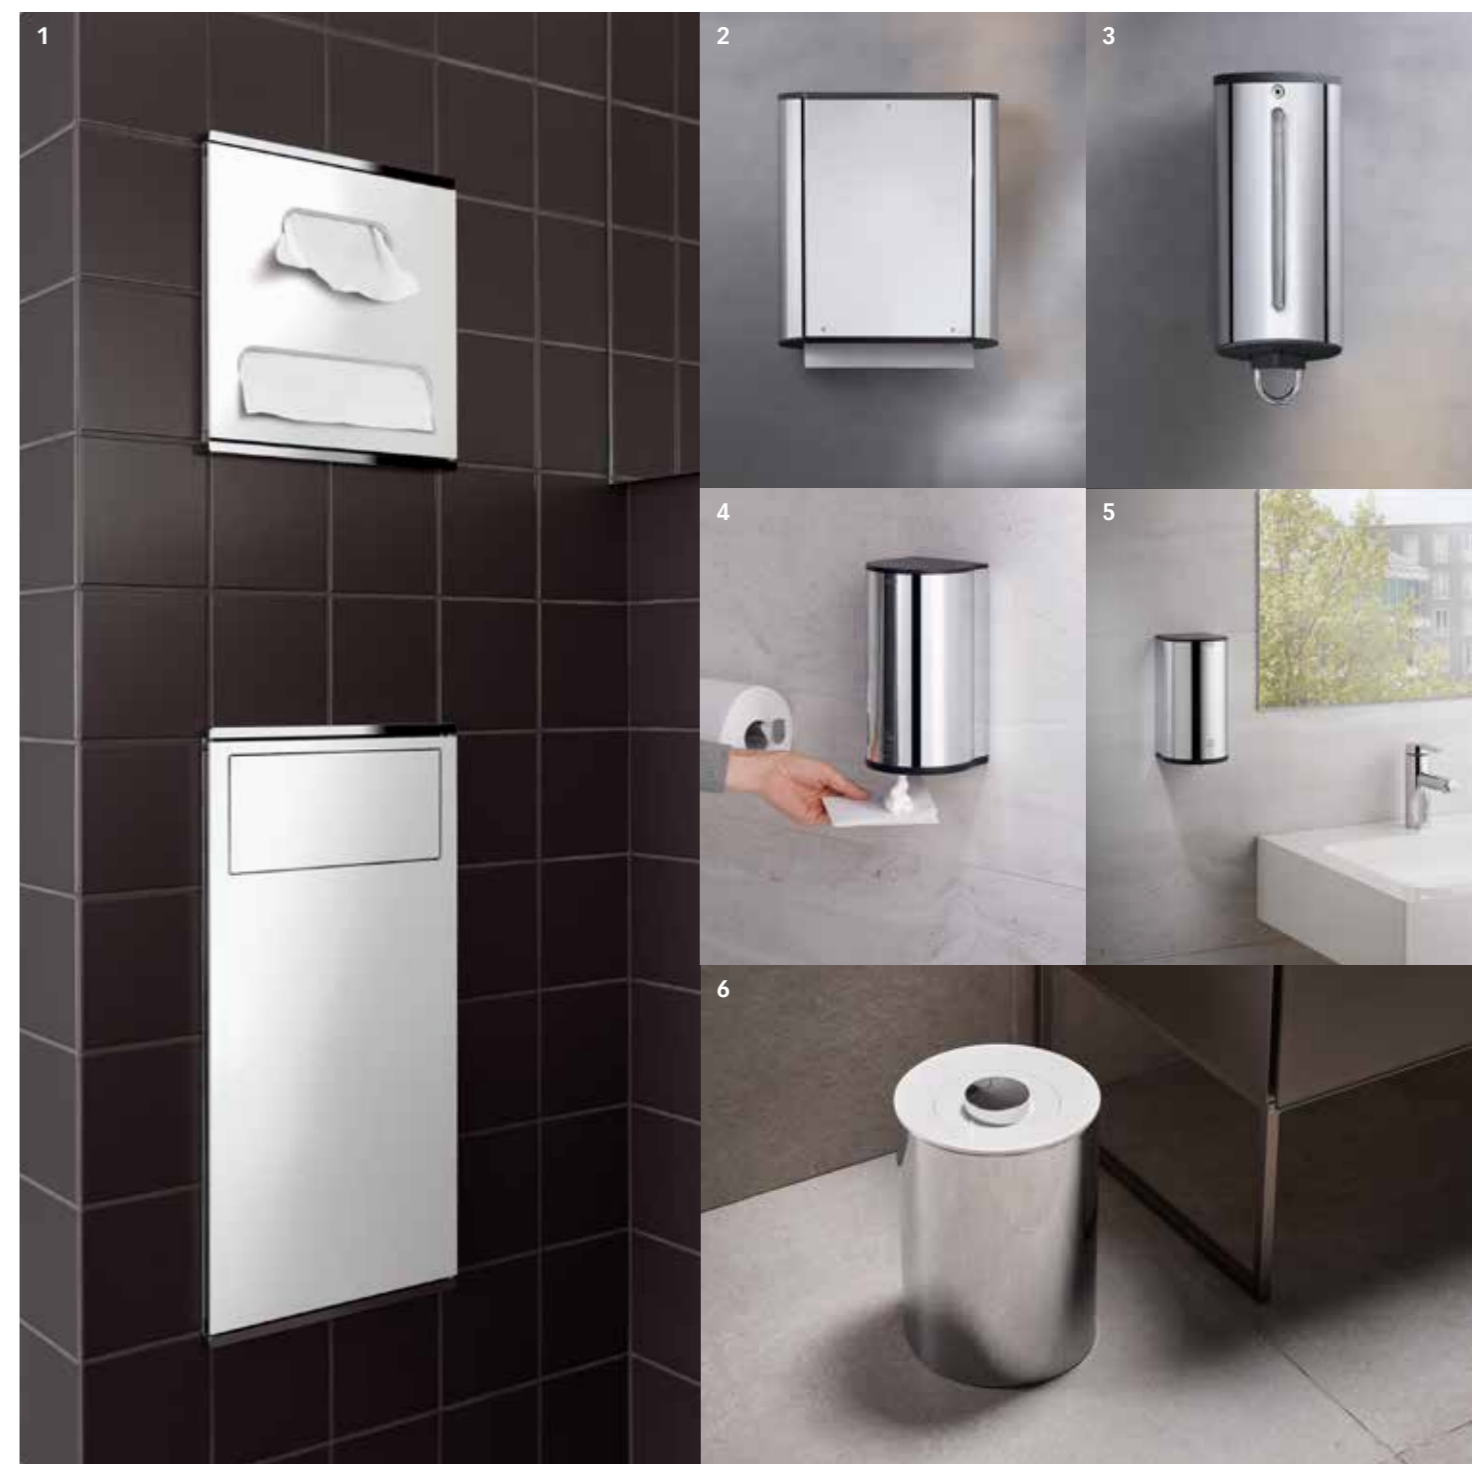

First choice

In public areas and buildings, special attention is paid to heavy-duty quality along with timeless design. That is why planners and installers often choose KEUCO here.

Not only is the ELEGANCE washbasin fitting beautiful, it is also clever: Thanks to the sensor on the fitting, the water for hand-washing runs without any contact. An extremely hygienic solution, especially for places with high frequency touch points.

Each item in the extensive accessories range for public and semi-public buildings offers hygienic comfort and a flawless finish. Numerous models for the washbasin or WC for either in-wall or wall-mounted installation are available in the KEUCO assortment.

- 1 PLAN Integral washbasin module
- 2 PLAN paper towel dispenser
- 3 PLAN lotion dispenser
- 4 PLAN hygiene foam dispenser
- 5 PLAN foam soap dispenser
- 6 PLAN waste bin

Making a difference is what our product developments are all about. The difference can be found in the functionality. Or in the product design. Or better yet, in both – paired with excellent KEUCO quality.
